Product Description

Uterus with Ovary Model, 2-Parts [SKU: MG36026] The model clearly shows the healthy uterine ovary in 2 parts, connected by a magnet. It allows observation of the entire structure of the uterus, which makes it an ideal piece for use in educational institutions or for demonstration in medical offices. Its base is made of polymer and, to attach the part, a metal pin is used. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology

and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 9.84 x 8.66 x 15.75
